Re: ICC Public Hearing Record

Dear Mr. Straus,

The following are my comments for the Public Hearing Record for the InterCounty Connector.

I support construction of the InterCounty Connector along the master plan alignment and urge the Maryland Department of Transportation to commence construction as soon as possible. My commute to work in Silver Spring is adversely impacted by the current traffic congestion which will only get worse without the ICC. This region needs to have the ICC along the master plan alignment to prevent further traffic congestion from having a severely detrimental impact to the local economy.

Sincerely,

Lee Johnson
