SECRETARY DEPARTMENT
OF TRANSPORTATION

Governor Glendening,

I have been reading all the articles about the ICC. Please consider another alternative-- upgrading existing roads, adding sidewalks, bike trails and investing in light rail.

The most important thing about our "Sub" Urban lifestyle are our neighborhoods where one can walk or bike to cafes, grocery stores, drug stores and Parks. A large road like the Interconnector destroys neighborhoods.

I don't live near the proposed road, but I've driven it and feel that providing many alternative pathways for the up county traffic is a much preferable solution. Your Same Growth plan for the state is an admirable goal and I've been working for it. Growth is good...., but it must be well thought out. The good of each local neighborhood into the new millenium should be paramount.

Thank you, Johnna Robinson
