Dear Ms Siegel

In your case see or maybe you
don't see I have directly in the path of
the EIS. It's difficult to express
my disgust of this whole process, at the
VFR, what amount of time given for
a forum in the public arena, but I will
just say that I want it stopped.
Why was this rejected in '83 and
so near approval today, is it due to some
political debt owed to developers. Please
help me believe that average people
still have a say.

Sincerely
Lawrence J. Hinkeli
